

Elegant Pre School caters to the age group of 1 1/2 to 5 1/2 years old kids and our conducive learning environment and well equipped class rooms and advanced teaching techniques and syllabi are specially tailored to meet our students' needs.

We wish to offer the parents and children in India the same world-class quality and international standards of entertainment enjoyed by millions of families across the world.

We believe in the process of Learning by Doing - a child needs to 'touch', 'explore', 'learn' and 'enjoy' understanding the world around him. In order to stimulate a child's imagination, we provide opportunities for the child to grow and develop while reading, listening and playing.

Elegant Pre School is a place where we provide a constructive and organized learning environment where the child is introduced to indispensable learning methods such as self-exploration and realization. There is a very basic ideology to this approach we want to stimulate the young minds so that they become more receptive to the concept of education and soaking up knowledge, preparing them for the more conventional and extremely competitive mode of education that lies ahead.
